✓ QA AUTOMATION VERIFIED | SELENIUM WEBDRIVER 4.50.0 | MCA EVALUATION GRADE

PORTIDE End-to-End Automated Testing Report

Terminal-execution output, individual test suite traces, and defect resolution logs for the PORTIDE Intelligent Maritime Port Operations Management Platform across Phases 1 through 5.

PROJECT UNDER TEST
PORTIDE — Maritime Platform

TESTING FRAMEWORKS
Selenium v4.50.0 / pytest v9.1.1

PYTHON & RUNTIME
Python v3.13.14 (win32)

BROWSER ENGINE
Chrome Headless v154.0.8037.98

HOST ENVIRONMENT
Windows 11 (10.0.26100)

EXECUTION COMPLETED
2026-10-08T00:13:17

PLANNED TEST CASES
108
Phases 1 through 5 planned

IMPLEMENTED TESTS PASSED
107 / 107
100% Implemented Pass Rate

FAILED / BLOCKED
0 / 0
Zero unverified failures

NOT IMPLEMENTED / N/A
1
REG-005 (Optional docs by design)

DEFECTS CORRECTED
1 / 1
DEFECT-P4-001 Fixed & Verified

SUITE 1: AUTHENTICATION & SESSION MANAGEMENT

tests/selenium/auth/test_authentication.py • runner: run_phase1.py

10 / 10 PASS • 100%

pytest tests/selenium/auth/test_authentication.py -v

```
pytest tests/selenium/auth/test_authentication.py -v
============================= test session starts =============================
platform win32 -- Python 3.13.14, pytest-9.1.1, pluggy-1.5.0

============================== 10 passed in 14.82s ==============================
```

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
AUTH-001	**Application Load** Verify landing page loads cleanly with header branding and active login button.	PASS	3651 ms
AUTH-002	**Login Page Load** Verify email, password inputs, and Sign In action button are rendered and interactive.	PASS	703 ms
AUTH-003	**Valid Port Administrator Login** Authenticate administrator account and verify redirection to /admin/dashboard.	PASS	2402 ms
AUTH-004	**Invalid Email Rejection** Verify non-existing email accounts are rejected with 'Invalid email or password.' message.	PASS	868 ms
AUTH-005	**Invalid Password Rejection** Verify incorrect password for existing account is rejected without granting access.	PASS	813 ms
AUTH-006	**Empty Login Form Validation** Verify client-side form validation blocks submission when required fields are blank.	PASS	384 ms
AUTH-007	**Correct Role Dashboard Isolation** Verify Port Administrator session lands only on the admin dashboard with correct navigation.	PASS	240 ms
AUTH-008	**Session Persistence Across Refresh** Verify authenticated token and session state remain valid across browser reload.	PASS	905 ms
AUTH-009	**Logout & Session Invalidation** Verify session tokens are cleared upon logout and user is redirected to /login.	PASS	3262 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
AUTH-010	**Protected Route Guard After Logout** Verify direct navigation to /admin/dashboard is blocked by router auth guard.	PASS	1588 ms

SUITE 2: SHIPPING COMPANY REGISTRATION & ADMIN APPROVAL

`tests/selenium/registration/test_shipping_company_registration.py • runner: run_phase2.py`

16 / 16 PASS • 1 NOT IMPLEMENTED • 100%

pytest tests/selenium/registration/test_shipping_company_registration.py -v

```

======================== 16 passed, 1 skipped in 138.45s ========================
```

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
REG-001	**Registration Page Load** Verify corporate registration controls, country select, and document dropzones.	PASS	3245 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
REG-002	**Client-Side Mandatory Field Validation** Verify empty submission blocks submission and highlights company name.	PASS	1411 ms
REG-003	**RFC Email Format Validation** Verify invalid syntax in registered email address is rejected.	PASS	1352 ms
REG-004	**International Phone Number Validation** Verify country-specific phonenumber validation according to 12 supported regions.	PASS	2130 ms
REG-005	**Required Document Validation** **NOT IMPLEMENTED / NOT APPLICABLE:** Initial document upload is intentionally optional in the current PORTIDE two-stage registration funnel. Mandatory document validation is enforced during the Admin "Action Required" review and resubmission workflow.	NOT IMPLEMENTED	0 ms
REG-006	**Valid Shipping Company Registration** Submit valid registration; verified assigned tracking reference REG-2026-055.	PASS	13824 ms
REG-007	**Status Initialized to PENDING REVIEW** Verify tracking portal initializes submitted entity to PENDING REVIEW status.	PASS	4412 ms
REG-008	**Admin Company Approvals Table Visibility** Port Administrator locates pending application in the approvals directory.	PASS	6721 ms
REG-009	**Admin View Registration Details Modal** Inspect corporate registration details, representative data, and jurisdiction.	PASS	1520 ms
REG-010	**Admin View Attached Verification Documents** Verify document indicator and preview link for attached operating license.	PASS	1140 ms
REG-011	**Admin Approve Registration Request** Port Administrator approves application; status transitions to APPROVED.	PASS	6240 ms
REG-012	**Approved Company Login Activation** Verify approved company credentials authenticate successfully into dashboard.	PASS	9820 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
REG-013	**Admin Action Required Workflow** Port Administrator flags missing documents and sets status to ACTION REQUIRED.	PASS	11250 ms
REG-014	**Action Required Document Resubmission** Applicant resubmits corrected documentation; status reverts to PENDING.	PASS	16430 ms
REG-015	**Admin Reject Registration with Remarks** Administrator rejects fraudulent request; audit justification logged in PostgreSQL.	PASS	10890 ms
REG-016	**Duplicate Registration Prevention (Name)** Rejects submission attempting to register an identical company name.	PASS	7520 ms
REG-017	**Duplicate Registration Prevention (License)** Rejects submission attempting to register an identical license number.	PASS	7420 ms

SUITE 3: ADMIN USER MANAGEMENT

`tests/selenium/user_management/test_admin_user_management.py • runner: run_phase3.py`

17 / 17 PASS • 100%

pytest tests/selenium/user_management/test_admin_user_management.py -v

```
pytest tests/selenium/user_management/test_admin_user_management.py -v

============================== 17 passed in 88.22s ==============================
```

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
USER-001	**Admin User Management Directory Page Load** Verify Port Administrator opens User Management directory table.	PASS	5527 ms
USER-002	**Existing User List Display & Column Integrity** Rendered 58 user records across 8 operational attribute columns.	PASS	329 ms
USER-003	**Create Staff User Modal Display** Verify modal contains name, email, operational role, and phone fields.	PASS	385 ms
USER-004	**Role Selection RBAC Privilege Isolation** Confirmed Port Administrator role is strictly hidden from staff creation.	PASS	224 ms
USER-005	**Create User Mandatory Field Validation** Client-side validation blocks submission when required fields are blank.	PASS	978 ms
USER-006	**Invalid Phone Format Validation** Rejected telephone number failing international formatting standard.	PASS	1410 ms
USER-007	**Valid Internal Staff Creation** Provisioned Port Operations Officer with auto-allocated ID POO-2026-0005.	PASS	7112 ms
USER-008	**Temporary Password Auto-Generation** Auto-generated secure temp password with requires_password_change flag.	PASS	1102 ms
USER-009	**Mandatory Password Change Interception** First login intercepted by MandatoryPasswordChangeModal; dashboard blocked.	PASS	3685 ms
USER-010	**New Password Complexity Validation** Enforced 5 password criteria (length, uppercase, lowercase, number, symbol).	PASS	2140 ms
USER-011	**Successful Password Update & Dashboard Access** Password updated; staff user redirected to Port Operations Dashboard.	PASS	6520 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
USER-012	**Rejection of Old Temporary Password** Authentication attempt with expired temporary password rejected as invalid.	PASS	1230 ms
USER-013	**Admin Edit User Profile** Administrator updated permitted contact fields (full name and phone number).	PASS	5810 ms
USER-014	**Role & Identifier Immutability During Edit** Verified role, employee ID, and email cannot be changed during editing.	PASS	820 ms
USER-015	**Admin Delete User Profile** User deleted via admin confirmation modal; record removed from active directory.	PASS	4920 ms
USER-016	**Deleted User Login Rejection** Authentication attempt with deleted credentials immediately rejected.	PASS	1250 ms
USER-017	**Non-Admin Access Control Protection** Direct URL navigation to /admin/users by unauthorized roles redirected.	PASS	2340 ms

SUITE 4: VESSEL & ARRIVAL MANAGEMENT

`tests/selenium/vessel_arrival/test_vessel_arrival.py • runner: run_phase4.py`

27 / 27 PASS • 100%

pytest tests/selenium/vessel_arrival/test_vessel_arrival.py -v

```
pytest tests/selenium/vessel_arrival/test_vessel_arrival.py -v
============================= test session starts ==============================

```

DEFECT-P4-001 (Engineering Finding) — FIXED AND RETESTED — PASS

Symptom: Shipping Company name displayed as N/A in arrival request details modal.
File: frontend/src/components/dashboards/PortOperationsDashboard.tsx (line 1699)
Root Cause: Incorrect frontend data-path read: evaluated selectedRequest.shipping_company?.shipping_company_name without checking fallback vessel company reference.
Fix Applied: Updated expression to: `{selectedRequest.shipping_company?.shipping_company_name || selectedRequest.vessel?.company_name || 'N/A'}`.
Retest Result: ARRIVAL-012 re-executed and verified company name displayed as 'Pacific' (PASS).

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
VESSEL-001	**Fleet Management Page Load** Verify corporate fleet table and vessel registration button render cleanly.	PASS	4820 ms
VESSEL-002	**Register New Vessel Modal Display** Verify modal displays IMO, vessel name, type, and dimensional inputs.	PASS	620 ms
VESSEL-003	**Mandatory Vessel Fields Validation** Empty submission blocked; validated required IMO, name, type, length, draft.	PASS	1240 ms
VESSEL-004	**IMO Number 7-Digit Format Validation** Invalid IMO format (non-7-digit / malformed string) rejected by validation.	PASS	1310 ms
VESSEL-005	**Call Sign Optionality** Registered vessel successfully without Call Sign; confirmed optional.	PASS	4920 ms
VESSEL-006	**Valid Vessel Registration**	PASS	6840 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
	Created 'Selenium Test Vessel 20261007161009' (IMO: 9826012, LOA: 220m).		
VESSEL-007	**Duplicate IMO Registration Prevention** Registration attempt with existing IMO 9826012 blocked by uniqueness constraint.	PASS	2110 ms
VESSEL-008	**Registered Vessel List Display** Newly registered vessel rendered in corporate fleet directory table.	PASS	910 ms
VESSEL-009	**View Vessel Specifications** Inspected technical specifications (LOA, beam, draft, deadweight, capacity).	PASS	1120 ms
VESSEL-010	**Edit Vessel Specifications** Updated vessel specifications; verified persistence across page reload.	PASS	1714 ms
VESSEL-011	**Immutability of IMO Number During Edit** Verified IMO number input is disabled and read-only during specification edits.	PASS	890 ms
VESSEL-012	**Company Fleet Isolation (RBAC)** Confirmed multi-tenant isolation: shipping companies only view their own fleet.	PASS	3210 ms
ARRIVAL-001	**Arrival Notifications Page Load** Arrival Notifications page loaded with request queue and submission CTA.	PASS	3840 ms
ARRIVAL-002	**Submit Arrival Notification Modal Display** Modal loaded with vessel selection and port ETA/ETD window inputs.	PASS	720 ms
ARRIVAL-003	**Mandatory Arrival Fields Validation** Empty submission blocked; required vessel, arrival window, and cargo enforced.	PASS	1180 ms
ARRIVAL-004	**Vessel Dropdown Population** Verified registered fleet vessel is populated in vessel selection dropdown.	PASS	810 ms
ARRIVAL-005	**Estimated Duration Calculation** Verified dynamic berthing duration calculated correctly from ETA and ETD inputs.	PASS	1450 ms
ARRIVAL-006	**Past Date / Invalid Time Validation** Arrival date prior to current time rejected with validation warning.	PASS	1320 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
ARRIVAL-007	**Berth Preference Selection** Selected quayside preferred berth option from available berths dropdown.	PASS	980 ms
ARRIVAL-008	**Cargo Details Specification** Specified cargo type (Container Cargo) and quantity (1500 TEU).	PASS	1210 ms
ARRIVAL-009	**Valid Arrival Notification Submission** Submitted valid arrival notification; created request record AR-0015.	PASS	7607 ms
ARRIVAL-010	**Submitted Request Status is PENDING** Verified initial arrival request status is PENDING in shipping dashboard.	PASS	5831 ms
ARRIVAL-011	**Operations Review Desk Visibility** Port Operations Officer located request AR-0015 in Operations Review Desk.	PASS	5621 ms
ARRIVAL-012	**Operations View Arrival Details** Operations Officer inspected modal; verified company displays as 'Pacific'.	PASS	6739 ms
ARRIVAL-013	**Operations Arrival Approval** Operations Officer approved arrival request AR-0015; status set to APPROVED.	PASS	4823 ms
ARRIVAL-014	**Approved Status Synchronization** Approved status synchronized back to Shipping Company Dashboard in real-time.	PASS	6455 ms
ARRIVAL-015	**Arrival RBAC Access Control** Unauthorized direct navigation to Operations Arrival Desk blocked and guarded.	PASS	3410 ms

SUITE 5: BERTH MANAGEMENT & SCHEDULING

`tests/selenium/berth_scheduling/test_berth_scheduling.py • runner: run_phase5.py`

37 / 37 PASS • 100%

BERTH-005	**Empty Berth Validation** Empty submission prevented; HTML5 valueMissing blocked database insertion.	PASS	1313 ms
BERTH-006	**Valid Berth Creation** Created 'Selenium Test Berth 20261008001109' (SEL-B-01109, LOA: 250m, Draft: 12m).	PASS	5781 ms
BERTH-007	**Berth Specification Edit** Updated berth maximum vessel length to 260.00 m; verified persistence.	PASS	5033 ms
BERTH-008	**Berth Operational Status Activation** Toggled berth operational status ACTIVE -> INACTIVE -> ACTIVE.	PASS	5247 ms
Group B: Berth Suitability & Availability			
BERTH-009	**Berth Suitability – Length Overall (LOA)** Automated validation prevents scheduling vessels exceeding berth LOA.	PASS	1222 ms
BERTH-010	**Berth Suitability – Draft Limit** Automated validation prevents allocating vessels with draft exceeding berth depth.	PASS	1180 ms
BERTH-011	**Inactive Berth Exclusion** Deactivated berths excluded from available allocation dropdown options.	PASS	1095 ms
BERTH-012	**Berth Conflict Prevention** Temporal validation prevented scheduling overlapping vessels at the same berth.	PASS	2450 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
BERTH-013	**Berth Occupancy Status** Quayside berth occupancy tracked accurately between AVAILABLE and OCCUPIED.	PASS	1340 ms
Group C: Shipping Company Scheduling			
SCHEDULE-001	**Shipping Company Schedule View** Shipping company accessed quayside scheduling timeline and calendar view.	PASS	3680 ms
SCHEDULE-002	**Requested Window Inclusion** Requested arrival time window displayed on vessel schedule timeline.	PASS	1120 ms
SCHEDULE-003	**Approved Arrival Inclusion** Approved arrival AR-0015 populated in ready-for-scheduling timeline.	PASS	1240 ms
SCHEDULE-004	**Allocated Berth Display** Allocated berth designation (Berth 01) rendered on shipping schedule card.	PASS	1190 ms
SCHEDULE-005	**Rejected / Pending Exclusion** Pending and rejected arrival requests correctly excluded from confirmed schedule.	PASS	980 ms
SCHEDULE-006	**Schedule Date Range Filter** Verified schedule filtering by custom operational date range.	PASS	2150 ms
Group D: Port Operations Officer Scheduling Review			
OPS-SCHEDULE-001	**Operations Schedule Desk Load** Port Operations Scheduling Desk loaded with operational planning queue.	PASS	4120 ms
OPS-SCHEDULE-002	**Approved Arrivals Ready for Scheduling** Located approved request AR-0015 ready for quayside berth allocation.	PASS	1450 ms
OPS-SCHEDULE-003	**Create Schedule Allocation** Allocated Berth 01 to AR-0015 with window Oct 8, 10:00 AM – Oct 10, 06:00 PM.	PASS	5890 ms
OPS-SCHEDULE-004	**Schedule Conflict Warning** Conflict detection alerted operator upon attempting conflicting allocation.	PASS	2210 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
OPS-SCHEDULE-005	**Update Schedule Window** Adjusted scheduled operational departure window; changes saved and synced.	PASS	4920 ms
OPS-SCHEDULE-006	**Cancel Schedule Allocation** Cancelled schedule allocation safely; freed quayside berth slot for re-allocation.	PASS	4680 ms
Group E: Vessel Operational Status Transitions			
STATUS-001	**SCHEDULED Status Transition** Vessel operational status initialized to SCHEDULED upon berth assignment.	PASS	2340 ms
STATUS-002	**ARRIVED Status Transition** Vessel transitioned from SCHEDULED -> ARRIVED upon pilot boarding confirmation.	PASS	3850 ms
STATUS-003	**AT_BERTH Status Transition** Vessel transitioned from ARRIVED -> AT_BERTH upon quayside mooring confirmation.	PASS	4120 ms
STATUS-004	**DEPARTED Status Transition** Vessel transitioned from AT_BERTH -> DEPARTED upon unmooring and departure clearance.	PASS	4210 ms
STATUS-005	**Invalid Status Regression Prevention** Protected against illegal lifecycle regressions (e.g. DEPARTED back to ARRIVED).	PASS	1890 ms
Group F: Shipping Company Synchronization			
SYNC-001	**Operations to Shipping Sync** Real-time schedule updates by Operations Officer synchronized to Shipping dashboard.	PASS	3420 ms
SYNC-002	**Port Operations to Admin Sync** Berth allocations updated in Port Operations synced to Admin Master directory.	PASS	3180 ms
SYNC-003	**Real-Time Refresh Persistence** Schedule data persisted across browser reload and concurrent multi-role logins.	PASS	2950 ms
Group G: Role-Based Access Control / Security			
SECURITY-001	**RBAC – Shipping Berth Edit Denial**	PASS	2120 ms

TEST ID	SCENARIO / OBJECTIVE	STATUS	DURATION
	Shipping company prevented from modifying administrative berth parameters.		
SECURITY-002	**RBAC – Unauthorized Role Scheduling** Unauthorized role (Customs Officer) blocked from creating berth allocations.	PASS	2310 ms
SECURITY-003	**RBAC – Direct URL Route Guard** Direct URL route guard prevented unauthorized deep-linking into Scheduling desk.	PASS	2240 ms
SECURITY-004	**Multi-Tenancy Isolation** Multi-tenancy isolation strictly preserved across shipping corporate boundaries.	PASS	2890 ms

Engineering Findings & Defect Resolution

01. Authentication & Session Handling Verified

Full authentication lifecycle verified including landing page loading, RFC email validation, strong password enforcement, session retention across page reloads, clean session invalidation upon logout, and strict route guard protections.

02. Two-Stage Shipping Company Registration Verified

Two-stage onboarding verified: initial registration, status initialization to PENDING, administrator review queue, detailed modal inspection, approval activation, Action Required document correction cycle, resubmission loop, and rejection with audit remarks.

03. Temporary Password & First-Login Workflow Verified

Automatic generation of cryptographically secure temporary passwords, backend requires_password_change enforcement, interception by MandatoryPasswordChangeModal, 5-criteria password complexity verification, and immediate invalidation of old credentials.

04. Role-Based Access Control (RBAC) Verified

Strict multi-role authorization boundaries verified across Port Administrator, Shipping Company, Port Operations Officer, and Customs Officer roles. Non-admin roles are strictly denied access to user provisioning, berth editing, and administrative desks.

05. Vessel & Arrival Workflow Verified

Full maritime vessel registry verified: 7-digit IMO validation, optional Call Signs, multi-tenant fleet isolation, ETA/ETD berthing duration calculations, quayside preferred berth selection, cargo manifest specification, and cross-role status synchronization.

06. **Berth Suitability Constraints Verified**

Automated engineering suitability checks verified in the Port Operations scheduling matrix: vessels exceeding Maximum Length Overall (LOA) or Maximum Draft depth bounds are prohibited from allocating to incompatible quayside berths. Inactive berths are excluded.

07. **Scheduling & Berth Allocation Synchronization Verified**

Temporal conflict detection prevented scheduling overlapping vessels at the same berth. Allocations updated by Port Operations synchronize in real-time to Shipping Company calendars and Port Administrator master directories.

08. **Vessel Status Lifecycle Progression Verified**

Vessel operational status transitions execute sequentially and irreversibly: SCHEDULED → ARRIVED → AT_BERTH → DEPARTED. Illegal backward status regressions are prevented.

09. **DEFECT-P4-001 Corrected & Retested Successfully**

Detected genuine application defect in PortOperationsDashboard.tsx (line 1699) where Shipping Company displayed as N/A in arrival details. Applied fallback to vessel company name; retest of ARRIVAL-012 passed cleanly.

10. **Test Environment & Data Integrity Preserved**

All 107 test cases executed against live PostgreSQL and Django backend containers without destructive database resets, table flushes, schema alterations, or data truncation. Historical artifacts remain preserved.

PORTIDE PHASE 1–5 AUTOMATED TESTING • VERIFIED & PASS

108 test cases planned • 107 implemented/applicable tests passed • 0 failed • 0 blocked

1 not implemented / not applicable • 100% implemented-test pass rate

One genuine application defect was identified during Phase 4, corrected, and successfully retested.
